# 1. BEFORE YOU BEGIN

## What Is Included

- Intimidator™ Spot Duo 150
- Hanging Bracket with Mounting Hardware
- Power Cord
- Warranty Card
- Quick Reference Guide

## Unpacking Instructions

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

## Claims

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

## Text Conventions

Convention	Meaning
1—512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
Menu > Settings	A sequence of menu options to be followed
<ENTER>	A key to be pressed on the product's control panel
ON	A value to be entered or selected

## Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

## Safety Notes

Please read the following Safety Notes carefully before working with the product. The Notes include important safety information about installation, usage, and maintenance.

- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Avoid direct eye exposure to the light source while the product is on.
- Make sure the power cord is not crimped or damaged.
- Never disconnect the product from power cord by pulling or tugging on the cord.
- If mounting the product overhead, make sure there is adequate support for the product's weight, and always secure to a fastening device using a safety cable.
- Make sure there are no flammable materials close to the product when operating.
- Do not touch the product's housing when operating because it may be very hot.

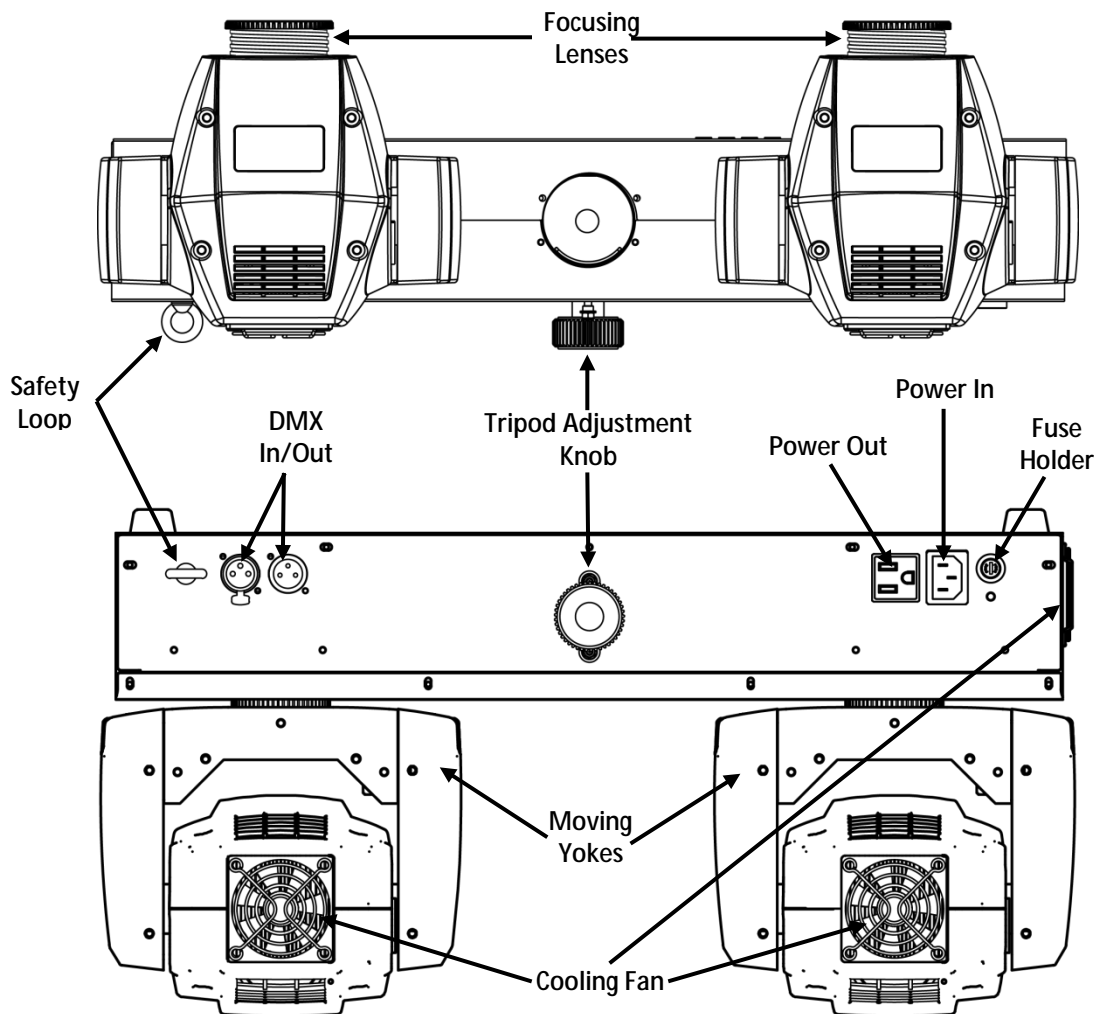

- The product is not intended for permanent installation.
- Always make sure that the voltage of the outlet to which you are connecting the product is within the range stated on the decal or rear panel of the product.
- The product is for indoor use only! (IP20) To prevent risk of fire or shock, do not expose the product to rain or moisture.
- Always install the product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- Be sure that no ventilation slots on the product's housing are blocked.
- Never connect the product to a dimmer or rheostat.
- Make sure to replace the fuse with another of the same type and rating.
- Never carry the product from the power cord or any moving part. Always use the hanging/mounting bracket.
- The maximum ambient temperature (Ta) is 104 °F (40 °C). Do not operate the product at higher temperatures.
- In the event of a serious operating problem, stop using the product immediately.
- Never try to repair the product. Repairs carried out by unskilled people can lead to damage or malfunction. Please contact the nearest authorized technical assistance center.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Keep this User Manual for future use. If you sell the product to someone else, be sure that they also receive this document.

## 2. INTRODUCTION

### Overview

# Dimensions

### 3. SETUP

**AC Power** The Intimidator™ Spot Duo 150 has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

**Always connect the product to a protected circuit (circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**

**Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.**

#### Fuse Replacement

**Disconnect the product from power before replacing the fuse.**

1. Disconnect the product from power.
2. With a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse.
4. Replace with a fuse of the same type and rating.
5. Screw the fuse holder cap back in place and reconnect power.

**Always replace a blown fuse with another of the same type and rating.**

#### Power Linking

The product provides power linking via the Edison/IEC outlet located in the back of the unit.

**You can power link up to 5 Intimidator™ Spot Duo 150 units on 120 VAC or up to 9 Intimidator™ Spot Duo 150 units on 230 VAC.**

**The power linking diagram shown above corresponds to the North American version of the product ONLY! If using the product in other markets, you must consult with the local CHAUVET® distributor as power linking connectors and requirements may differ in your country or region.**

**Mounting** Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#).

**Orientation** The Intimidator™ Spot Duo may be mounted in any position; however, make sure adequate ventilation is provided around the product.

- Rigging**
- Before deciding on a location, always make sure there is easy access to the product for maintenance and programming.
  - Make sure that the structure or surface onto which you are mounting the product can support the product's weight (see the [Technical Specifications](#)).
  - When mounting the product overhead, always use a safety cable (such as **CH-05** from Chauvet). Mount the product securely to a rigging point, such as an elevated platform or a truss.
  - When rigging the product onto a truss, you should use a mounting clamp of appropriate weight capacity. The bracket has 13-mm holes, which are appropriate for this purpose.
  - When power linking multiple products, you must always consider the length of the power linking cable and mount the products close enough for the cable to reach.
  - Only loosen or tighten the tripod adjustment knob manually. Using tools could damage the knob.
  - The rubber feet also serve as floor supports. When mounting the product on the floor, make sure that the product and cables are away from people and vehicles.

**Mounting Diagram**

**When using only one mounting clamp with this fixture, you must use a clamp with a captive bolt to prevent accidental loosening.**

## 4. OPERATION

### Control Panel Operation

To access the control panel functions, use the four buttons located underneath the display.

Button	Function
<MENU>	Exits from the current menu or function
<UP>	Navigates upwards through the menu list and increases the numeric value when in a function
<DOWN>	Navigates downwards through the menu list and decreases the numeric value when in a function
<ENTER>	Enables the currently displayed menu or sets the currently selected value into the selected function

### Menu Map

Modes	Programming Levels	Description
DMX Address	d001–d512	Sets the DMX starting address
Automatic	A-01–A-16	Automatic mode
Sound-Active	Srun	Sound-Active mode
Slave	Son1	Slave operating mode 1
	Son2	Slave operating mode 2
Sound Sensitivity	S-01–S-99	Sound sensitivity control
Master Auto	M--4	Master built-in 4-head program
	M--2	Master built-in 2-head program
Pan 1	PA1	Normal pan operation for head 1
	rPA1	Reverse pan operation for head 1
Pan 2	PA2	Normal pan operation for head 2
	rPA2	Reverse pan operation for head 2
Tilt 1	ti1	Normal tilt operation for head 1
	rti1	Reverse tilt operation for head 1
Tilt 2	ti2	Normal tilt operation for head 2
	rti2	Reverse tilt operation for head 2
Display	diS	Normal display
	rdiS	Inverted display
Channel Mode	20CH	20-channel DMX personality
	17CH	17-channel DMX personality
	10CH	10-channel DMX personality
Pan Range	PA36	360° pan range
	PA18	180° pan range
Tilt Range	ti27	270° tilt range
	ti18	180° tilt range
	ti 9	90° tilt range
Reset	rESt	Resets product
Load	LoAd	Loads factory defaults

---

## Configuration (DMX)

Set the product in DMX mode to control with a DMX controller.

1. Connect the product to a suitable power outlet.
2. Connect a DMX cable from the DMX output of the DMX controller to the DMX input socket on the product.

## Starting Address

When selecting a starting DMX address, always consider the number of DMX channels the selected DMX mode uses. If you choose a starting address that is too high, you could restrict the access to some of the product's channels.

The Intimidator™ Spot Duo 150 uses up to 20 DMX channels in its 20-channel DMX mode, which defines the highest configurable address to **493**.

If you are not familiar with the DMX protocol, download the DMX Primer from [www.chauvetlighting.com](http://www.chauvetlighting.com).

To select the starting address, do the following:

1. Press **<MENU>** repeatedly until **d001—d512** shows on the display.
2. Use **<UP>** or **<DOWN>** to select the starting address.
3. Press **<ENTER>**.

## DMX Personalities

The Intimidator™ Spot Duo 150 has three DMX personalities: a 10-channel personality, a 17-channel personality, and a 20-channel personality.

To choose a DMX personality, follow the steps below:

1. Press **<MENU>** repeatedly until **10CH**, **17CH**, or **20CH** shows on the display.
2. Use **<UP>** or **<DOWN>** to select the personality.
3. Press **<ENTER>**.

## DMX Channel Modes, Assignments, and Values

20CH	Channel	Function	Value	Setting

## Configuration (Standalone)

Set the product in one of the standalone modes to control without a DMX controller.

- Connect the product to a suitable power outlet.

**Never connect a product that is operating in any standalone mode to a DMX string connected to a DMX controller. Products in standalone mode may transmit DMX signals that could interfere with the DMX signals from the controller.**

### Sound-Active Mode

To enable the Sound-Active mode, do the following:

1. Press **<MENU>** repeatedly until **Srun** shows on the display.
2. Press **<ENTER>**.

### Sound Sensitivity

To set the sound sensitivity, follow the instructions below:

1. Press **<MENU>** repeatedly until **S-01—S-99** shows on the display.
2. Use **<UP>** or **<DOWN>**: to select the desired sound sensitivity.
3. Press **<ENTER>**.

**The product will only respond to low frequencies of music (bass and drums).**

### Automatic Mode

To enable the Automatic mode, do the following:

1. Press **<MENU>** repeatedly until **A-01—A-16** shows on the display.
2. Use **<UP>** or **<DOWN>** to select the desired auto program.
3. Press **<ENTER>**.

---

**Pan Operation** To select whether you want the Intimidator™ Spot Duo 150 to operate with normal panning or inverted panning, do the following:

**Head 1:**

1. Press **<MENU>** repeatedly until **PA1** (normal pan operation) or **rPA1** (reverse pan operation) shows on the display.
2. Use **<UP>** or **<DOWN>** to select the desired pan operation.
3. Press **<ENTER>**.

**Head 2:**

Repeat steps 1 to 3 with the options **PA2** and **rPA2** for Head 2's pan operation.

**Tilt Operation** To select whether you want the Intimidator™ Spot Duo 150 to operate with normal tilting or inverted tilting, do the following:

**Head 1:**

1. Press **<MENU>** repeatedly until **ti1** (normal tilt operation) or **rti1** (reverse tilt operation) shows on the display.
2. Use **<UP>** or **<DOWN>** to select the desired tilt operation.
3. Press **<ENTER>**.

**Head 2:**

Repeat steps 1 to 3 with the options **ti2** and **rti2** for Head 2's tilt operation.

**Pan/Tilt Angle Range** You are able to select the range for the pan and tilt angles on the Intimidator™ Spot Duo 150 to achieve the effect you like.

To select which pan angle range to use, follow the instructions below.

1. Press **<MENU>** repeatedly until either **PA36** (0–360° range) or **PA18** (0–180° range) shows on the display.
2. Use **<UP>** or **<DOWN>** to select the desired pan range.
3. Press **<ENTER>**.

To select which tilt angle range to use, do the following.

1. Press **<MENU>** repeatedly until **ti27** (0–270°), **ti18** (0–180°), or **ti 9** (0–90°) shows on the display.
2. Use **<UP>** or **<DOWN>** to select the desired tilt range.
3. Press **<ENTER>**.

**Display** You are able to flip the display for easy readability in any mounting situation.

To select your display angle:

1. Press **<MENU>** repeatedly until **diS** (normal display) or **rdiS** (inverted display) shows on the display.
2. Press **<UP>** or **<DOWN>** to select desired display.
3. Press **<ENTER>**.

**Reset Software** To reset the software on the Intimidator™ Spot Duo 150, do the following:

1. Press **<MENU>** and until **rESt** shows on the display.
2. Press **<ENTER>**.

**Load Factory Defaults** To load the factory default settings on the Intimidator™ Spot Duo 150, do the following:

1. Press **<MENU>** until **LoAd** shows on the display.
2. Press **<ENTER>**.

---

## Master Auto Programs

The Master Auto built-in programs control the actions of two Intimidator™ Spot Duo 150 units linked together by DMX data connection. A single Intimidator™ Spot Duo 150 (the master) controls the actions of another Intimidator™ Spot Duo 150 (the slave). Configure the Master Auto programs in conjunction with the Slave modes as follows.

### Master Auto 4-Head Program

The Master Auto 4-Head program allows all 4 heads of two linked Intimidator™ Spot Duo 150 units to operate in unison. The master will be set to operate in the **M--4** program, while the slave will be set to operate in either **Son1** or **Son2** mode.

Configure the units as indicated below.

#### Master:

1. Press **<MENU>** repeatedly until **M--2** or **M--4** shows on the display.
2. If it is not already selected, use **<UP>** or **<DOWN>** to select **M--4**.
3. Press **<ENTER>**.

#### Slave:

1. Press **<MENU>** repeatedly until **Son1** or **Son2** shows on the display.
2. Use **<UP>** or **<DOWN>** to select either **Son1** or **Son2**.
  - Select **Son1** for 100% synchronized actions.
  - Select **Son2** for a delayed show with all 4 heads in the same direction.
4. Press **<ENTER>**.

- **Configure all the slaves before connecting the master unit to the DMX daisy chain.**
- **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.**
- **Do not connect more than 31 slaves to the master unit.**

### Master Auto 2-Head Program

The Master Auto 2-Head program allows a single Intimidator™ Spot Duo 150 to control the actions of another Intimidator™ Spot Duo 150. The master will be set to operate in the **M--2** program, while the slave will be set to operate in either **Son1** or **Son2** mode.

Configure the units as indicated below.

#### Master:

1. Press **<MENU>** repeatedly until **M--2** or **M--4** shows on the display.
2. If it is not already selected, use **<UP>** or **<DOWN>** to select **M--2**.
3. Press **<ENTER>**.

#### Slave:

1. Press **<MENU>** repeatedly until **Son1** or **Son2** shows on the display.
2. Press **<UP>** or **<DOWN>** to select either **Son1** or **Son2**.
  - Select **Son1** for 100% synchronized actions.
  - Select **Son2** for the same show with both units, but the actions of the slave are in the opposite direction of the actions of the master.
3. Press **<ENTER>**.

- **Configure all the slaves before connecting the master to the DMX daisy chain.**
- **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.**
- **Do not connect more than 31 slaves to the master unit.**

---

## 5. TECHNICAL INFORMATION

### **Product Maintenance**

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and mechanical wear. To maintain optimum performance and minimize wear, clean the product at least twice a month. However, usage and environmental conditions contribute to increased cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents and reachable internal components.
4. Clean all external optics and glass/transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
6. Softly wipe any dirt or grime to the outside edges of the external optics or glass/transparent surface.
7. Gently polish the external optics and glass/transparent surfaces until they are free of haze and lint.

**Always dry the external optics and glass/transparent surfaces carefully after cleaning them.**

**Do not spin the cooling fan using compressed air because you could damage it.**

To return a product or request support:

- In the U.S., contact Chauvet World Headquarters (See [Contact Us](#)).
- In the UK or Ireland, contact Chauvet Europe Ltd. (See [Contact Us](#)).
- In Mexico, contact Chauvet Mexico. (See [Contact Us](#)).
- In any other country, DO NOT contact Chauvet. Instead, contact your lighting distributor. See [www.chauvetlighting.com](http://www.chauvetlighting.com) for distributors outside the U.S., UK, Mexico, or Ireland.

**Outside the U.S., UK, Mexico, or Ireland, contact your distributor and follow their instructions on how to return Chauvet products to them. Visit our website for contact details.**

## Returns

Call the corresponding Chauvet Technical Support office and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.

You must send the merchandise prepaid, in its original box, and with its original packing and accessories. Chauvet will not issue call tags.

Clearly label the package with the RMA number. Chauvet will refuse any product returned without an RMA number.

**Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.**

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

**Chauvet reserves the right to use its own discretion to repair or replace returned product(s).**
